AI Club

Club Plan – 26J to 26D Leadership Transition

Agenda

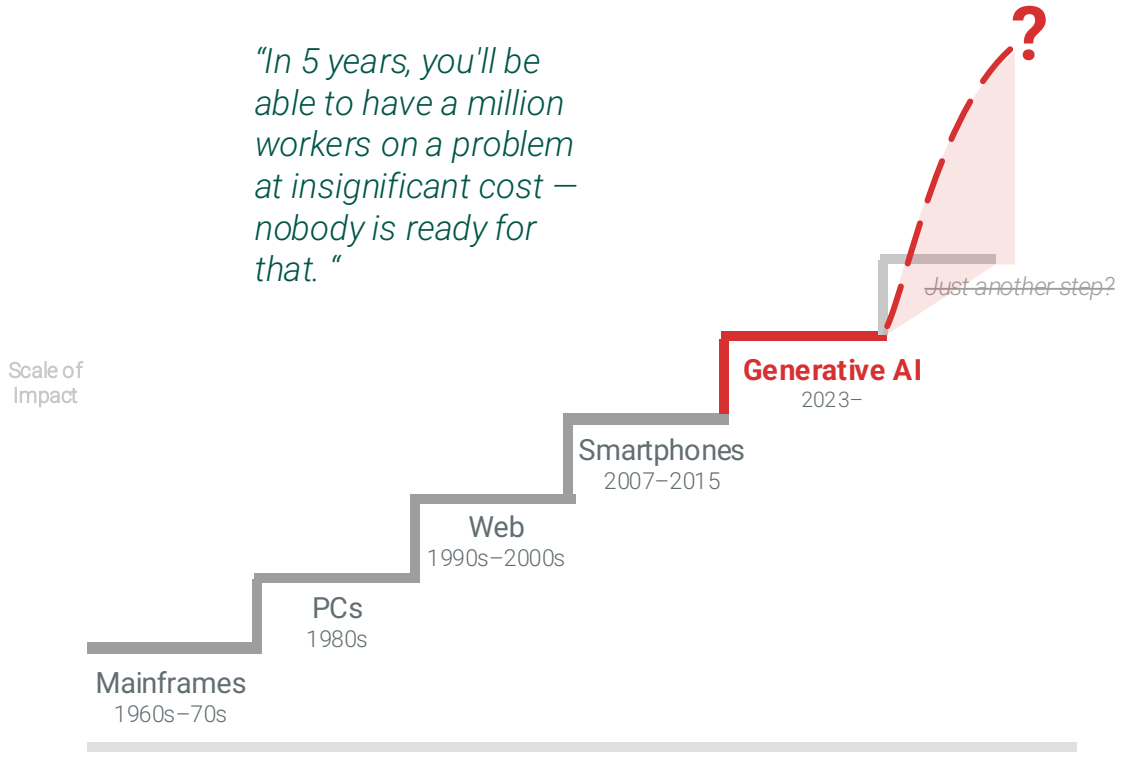
The AI Shift and Our Mission 1

The Team Driving AI Club 2

From Vision to Action 3

A new platform shift is underway, but this one feels different…

"In 5 years, you'll be able to have a million workers on a problem at insignificant cost — nobody is ready for that. "



Source: Benedict Evans, June 2025

…and we want INSEAD to be ready for it

Hidden-use culture

Most students are already using AI - they're just doing it alone. There's an opportunity to make that visible and shared

The hardest part is knowing what is possible

People want to do more with AI - they just need inspiration and a clear place to start.

Nothing persists between cohorts

Great tools and workflows get built every year - but they leave with the people who made them. We can change that

Wide maturity spectrum

Some students haven't touched AI beyond ChatGPT. Others are building agents. Right now nothing serves both.

Impossible to keep up alone

The pace is relentless and only getting faster. A shared space to make sense of it all

Our mission is to empower the next generation of INSEAD AI leaders through three key objectives

Club Mission

Give INSEAD students the space, structure, and community to go further with AI than they would alone.

Club Vision

To build the most practically useful - and genuinely enjoyable - club at INSEAD. One where what gets built this year makes next year's cohort better and where the people you meet shape how you think about AI long after campus.

1 External Relations

- Guest speakers & industry practitioners
- Alumni career events & networking
- Inter-club collaboration (Energy Club, TMT Club)
- Corporate partnerships & sponsorships
- External communications & social presence
- Non-AI org outreach - how traditional businesses are embedding AI into existing models

2 Learning

- INSEAD AI Maturity Framework: structured learning tracks from "what is an LLM" to "build your own automation" - meet people where they are
- Practical workshops: build things, don't watch demos
- Curated resources, tools, reading lists

3 Building

- Tools for INSEAD life - CV formatting, meeting transcription, assignment prep. Things you'll actually use
- INSEAD AI Tool Repository on GitHub - everything we build persists for future cohorts. No more starting from zero
- Build sprints and hackathons - teams around real student pain points, demos, peer feedback
- AI skills employers look for - the workshops that show up on a CV

Agenda

The AI Shift and Our Mission 1

The Team Driving AI Club 2

From Vision to Action 3

Leadership that will make an impact

Role	Responsibility
Co-President	Leads overall club execution by aligning teams, setting direction, and ensuring smooth operations across all functions.
VP External Relations	Builds the club's external network through speakers, alumni engagement, career help, and inter-club collaboration.
VP Learning	Drives member upskilling through structured learning programs, workshops, and practical AI education.
VP Building	Leads hands-on technical initiatives by developing club tools, supporting community projects, and enabling real-world AI builds.

Agenda

The AI Shift and Our Mission 1

The Team Driving AI Club 2

From Vision to Action 3

Our key focus areas, we have outlined key initiatives to prioritize throughout our leadership period

	P1	P2	P3	P4	P5
External Relations	Secured additional leadership positions with student life Established contact with AI Leaders	Events with AI Industry Leaders			
		Events with Alumni Network			
			Organize Treks (eg: Mistral, Station F) $		
				Career Assistance (eg: referrals, job postings)	
Learning	Program of learning initiatives	Student engagement (eg: Monthly Newsletter "The Prompt", Industry Updates, AI Usecase Library)			
			Prompting & AI Workflow Bootcamps		
Building	Strong pipeline of ideas	GitHub repository - Design AI tools for students (ex: CV builder, workflow automation) $			
			Build & Maintain AI Tools for current/future students $		

$ Requires Funding Career Related

INSEAD AI CLUB

Appendix - Team Breakdown

Joshua Dawe

Background:
- 6+ Years of Energy Trading experience
- Leveraged AI tools to aid in research, idea generation, and python coding

AI Interest: AI in Financial Services and agentic automation

Sashin Pillay

Background:
- Strategy & Operations Lead at largest Google Cloud Partner in Africa; 5.5 years in Product Marketing at Google

AI Interest: Driving access in developing economies

Justin Foo

Background:
- Senior Architect, Government of Singapore
- 6+ years in public service
- Led AI-powered national public engagement platform

AI Interest: Advancing dialogue on AI's impact on society and business

Siena Belda

Background:
- 6+ years in Revenue and Pricing Strategy & Operations background in the Tech and Healthcare sectors

AI Interest/ Experience: Agentic automation

Appendix - Team Breakdown

Freddie Chambers

Background:
- 7 years at WPP - platform strategy and enterprise tech adoption across EMEA

AI Interest:
- Claude code automations across research, note-taking and daily briefings.
- AI implications on the future of education (academic integrity, societal impact, future of work)

Sanam Nanwani

Background:
- Data & Strategy Manager at AI-driven investment intelligence platform
- Led AI projects that improved operational efficiency and drove growth.

AI Interest/ Experience:
- Leveraging AI in Business Strategy and Financial Services

Isabella Isotta

Background:
- Strategy Consulting at OC&C, focussed largely in TMT sector

AI Interest/ Experience:
- Exploring potential applications of AI in B2B professional services

Bhaskar Venkatraman

Background:
- Tech Consulting in EY for financial services in the fraud domain
- software engineer at a top bank in the US leading in house fraud transformation

AI Interest/ Experience:
- Interested in launching an AI startup in fraud domain

Appendix - Team Breakdown

Liyang Guo

Background:
- Strategy manager at Monitor Deloitte focusing on Life Science sector

AI Interest/ Experience:
- Vibe coding: Tennis court booking PWA for ParisTennis (https://tennis-pwa-psi.vercel.app/login)
- Interest in latest AI development: OpenClaw personal assistant

Saurabh Bhatia

Background:
- AI Product Manager in B2B SaaS Startups (5yr exp)
- Built and scaled AI-native products across geographies

AI Interest/ Experience:
- AI Theory and research
- AI Product Management Educator
- Interested in AI + Healthcare applications

Christina Chen

Background:
- Senior Product Manager at Workday focused on Search & Recommendation Systems
- UC Berkeley Master in Data Science
- 9+ years in tech in NYC & SF

AI Interest/ Experience:
- AI applications in health, wellness, femtech, productivity, community

Appendix - Roles and Responsibilities Breakdown

Role	Key Activities
Co-President	• Coordinate and collaborate across all VP functions • Oversee budget planning and resource allocation • Help define and execute club objectives, strategy, and mission • Ensure alignment across initiatives and smooth club operations
VP External Relations / Alumni	• Organize guest speakers, industry talks, and career-focused events • Build relationships with alumni and external partners • Lead inter-club collaboration initiatives • Support sponsorships, partnerships, and outreach efforts • Speakers, inter-club, partnerships, corporate
VP Learning	• Run teach-ins, study sessions, and AI learning workshops • Design structured learning pathways for members at different skill levels • Curate learning resources, tools, and reading lists • Help members build practical AI knowledge and applied skills
VP Building	• Lead development of the club's tool/platform ecosystem • Organize technical projects and hands-on build initiatives • Support prototyping, demos, and member project collaboration • Create opportunities for members to apply AI through real builds
